The value of experience-

Your watch starts running late, or stops running altogether. You do not even try to fix it yourself. You take it to an expert watch-maker.

His ability is founded on experience. Some time in his life he has studied a watch just like yours. He knows every spring and wheel.

The work of Library Bureau service-salesmen is just as precise, exact and true to fundamental laws as that of the watch maker. These men know their business. They can tell you why your filing system is running slow, or why it sometimes stops altogether. Sometime in their life they have met conditions similar to yours.

You want your watch to be accurate because you do not want to lose time. You want accuracy in the filing department for the same reason.

Does your file clerk have trouble producing-instantly -letters filed yesterday-last week, or six months ago? Come in and let us show you a method of handling correspondence which puts an end to that all too-familiar phrase-"I remember putting it alway, but I can't find it nolv."
